Expense Example (unaudited)

Growth Portfolio

As a shareholder of the Growth Portfolio (the “Fund”), you incur two types of costs: (1) insurance company charges; and (2) ongoing costs, which may include advisory fees, administration fees, distribution (12b-1) fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

This example is based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2020 and held for the entire six-month period.

Actual Expenses

The table below provides information about actual account values and actual expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Actual Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any insurance company charges. Therefore, the table below is useful in comparing ongoing costs, but will not help you determine the relative total cost of owning different funds. In addition, if these insurance company charges were included, your costs would have been higher.

	Beginning Account Value 7/1/20	Actual Ending Account Value 12/31/20	Hypothetical Ending Account Value	Actual Expenses Paid During Period*	Hypothetical Expenses Paid During Period*	Net Expense Ratio During Period**
Growth Portfolio Class I	\$1,000.00	\$1,429.00	\$1,022.32	\$3.42	\$2.85	0.56%
Growth Portfolio Class II	1,000.00	1,427.00	1,021.06	4.94	4.12	0.81

* Expenses are calculated using each Fund Class’ annualized net expense ratio (as disclosed), multiplied by the average account value over the period and multiplied by 184/366 (to reflect the most recent one-half year period).

** Annualized.

Investment Overview (unaudited)

Growth Portfolio

The Fund seeks long-term capital appreciation by investing primarily in growth-oriented equity securities of large capitalization companies.

Performance

For the fiscal year ended December 31, 2020, the Fund's Class I shares had a total return based on net asset value and reinvestment of distributions per share of 117.31%, net of fees, and 116.76%, net of fees, for Class II shares. The Fund's Class I and Class II shares outperformed the Fund's benchmark, the Russell 1000® Growth Index (the "Index"), which returned 38.49%.

Please keep in mind that high triple-digit returns are highly unusual and cannot be sustained. Investors should also be aware that these returns were primarily achieved during favorable market conditions.

Factors Affecting Performance

- U.S. equities reversed a steep sell-off caused by the COVID-19 pandemic shock, aided by massive fiscal and monetary stimulus that kept liquidity flowing and supported a faster-than-expected rebound in economic activity. Promising vaccine news throughout the year, along with the start of vaccine distribution across the U.S. and Europe in December 2020, also helped investors look past resurgences of the virus and renewed curbs on social and business activity that have slowed the economic recovery in the short term. Political uncertainty eased after the U.S. election in November 2020, with markets taking a positive stance on a Biden administration and the prospect for additional fiscal stimulus in 2021.
- Within the Index, consumer discretionary, information technology and communication services were the top-performing sectors for the year, while energy (the only sector with a negative return), real estate and industrials were the weakest performers.
- Counterpoint Global seeks high quality companies, which we define primarily as those with sustainable competitive advantages. We manage concentrated portfolios that are highly differentiated from the benchmark, with securities weighted on our assessment of the quality of the company and our conviction. The value added or detracted in any period of time will result from stock selection, given our philosophy and process. For the year, the Fund outperformed the Index.
- The long-term investment horizon and conviction-weighted investment approach embraced by the team since 1998 can result in periods of performance deviation from the benchmark and peers. The Fund outperformed the Index in this reporting period largely due to favorable stock selection and a small contribution from sector allocations.
- Stock selection was the strongest across the information technology sector. A proprietary cloud-based communications platform that connects users through frictionless video, voice, chat and content sharing, was the top contributor in the sector and across the portfolio. Its shares continued to advance on solid results which significantly surpassed expectations and were characterized by strong revenue growth, customer base expansion, speed to scale in international markets, higher profit margins, traction with new products, and a raised financial outlook. The company has experienced growing use of its products by both consumers and businesses as video-based communication has become mission critical during the COVID-19 pandemic.
- Stock selection in the health care and consumer discretionary sectors also contributed to relative outperformance. In health care, the top contributor was a provider of cloud-based software solutions to the life sciences industry. Fundamentals remain strong at the company, as it reported revenue and profitability that beat consensus estimates, driven by strong performance and increasing customer adoption of its solutions across both its platforms. Management also commented on an improving environment across its life sciences end markets and raised its financial outlook accordingly. In consumer discretionary, an online used car marketplace was the top contributor to relative outperformance in the sector. The company experienced a rebound in demand and reported better than expected unit sales and profitability, despite constrained inventory levels resulting from the company's decision to slow vehicle acquisition earlier in the pandemic. The company has benefited from the accelerating shift to buying cars online, and is working toward improving vehicle inventory levels by accelerating hiring efforts and opening additional inspection and reconditioning centers.

Investment Overview (unaudited) (cont'd)

Growth Portfolio

- Given the magnitude of the Fund's outperformance relative to the benchmark, there were no meaningful sector detractors from performance. An overweight to health care was detrimental on a relative basis but was more than offset by the outperformance of our stock selection in the sector.
- Although the information technology sector was by far the largest contributor to performance, the strength in these holdings was partly offset by weakness in a provider of cloud-based financial and human resources management software, which was the largest detractor across the portfolio.

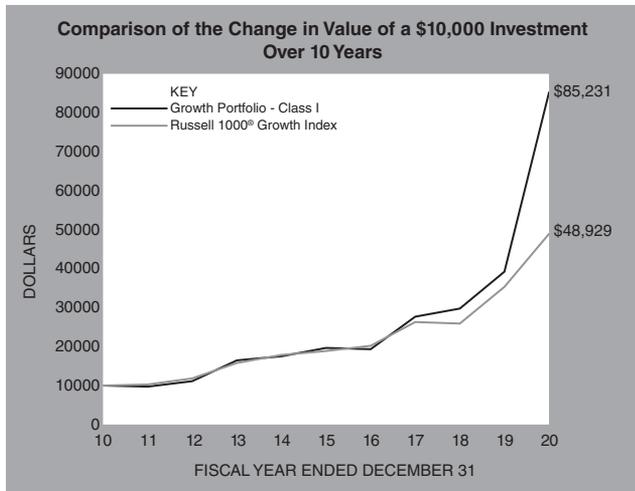

Management Strategies

- As a team, we believe having a market outlook can be an anchor. Our focus is on assessing company prospects over a five-year horizon, and owning a portfolio of unique companies whose market value we believe can increase significantly for underlying fundamental reasons.

Performance Compared to the Russell 1000® Growth Index⁽¹⁾

	Period Ended December 31, 2020			
	Total Returns ⁽²⁾			
	Average Annual			
	One Year	Five Years	Ten Years	Since Inception ⁽⁵⁾
Fund – Class I ⁽³⁾	117.31%	34.10%	23.90%	13.49%
Russell 1000® Growth Index	38.49	21.00	17.21	9.72
Fund – Class II ⁽⁴⁾	116.76	33.77	23.58	16.83
Russell 1000® Growth Index	38.49	21.00	17.21	12.44

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Performance assumes that all dividends and distributions, if any, were reinvested. For the most recent month-end performance figures, please contact the issuing insurance company or speak with your financial advisor. Investment return and principal value will fluctuate so that Fund shares, when redeemed, may be worth more or less than their original cost. Total returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance shown does not reflect fees and expenses imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total returns would be lower.

In accordance with SEC regulations, the Fund's performance shown assumes that all recurring fees (including management fees) were deducted and all dividends and distributions were reinvested. The performance of Class II shares will vary from the performance of Class I shares based upon its different inception date and will be negatively impacted by additional fees assessed to that class.

- (1) The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Index is an index of approximately 1,000 of the largest U.S. companies based on a combination of market capitalization and current index membership. The Index is unmanaged and its returns do not include any sales charges or fees. Such costs would lower performance. It is not possible to invest directly in an index.
- (2) Total returns for the Fund reflect fees waived and expenses reimbursed, if applicable, by the Adviser (as defined herein). Without such waivers and reimbursements, total returns would have been lower.
- (3) Commenced operations on January 2, 1997.
- (4) Commenced offering on May 5, 2003.
- (5) For comparative purposes, average annual since inception returns listed for the Index refers to the inception date or initial offering of the respective share class of the Fund, not the inception of the Index.

Growth Portfolio

- (a) Non-income producing security.
- (b) Security cannot be offered for public resale without first being registered under the Securities Act of 1933 and related rules ("restricted security"). Acquisition date represents the day on which an enforceable right to acquire such security is obtained and is presented along with related cost in the security description. The Fund has registration rights for certain restricted securities. Any costs related to such registration are borne by the issuer. The aggregate value of restricted securities (excluding 144A holdings) at December 31, 2020 amounts to approximately \$22,815,000 and represents 2.0% of net assets.
- (c) At December 31, 2020, the Fund held fair valued securities valued at approximately \$2,421,000, representing 0.2% of net assets. These securities have been fair valued as determined in good faith under procedures established by and under the general supervision of the Company's (as defined herein) Directors.
- (d) The approximate fair value and percentage of net assets, \$16,530,000 and 1.5%, respectively, represent the securities that have been fair valued under the fair valuation policy for international investments as described in Note A-1 within the Notes to the Financial Statements.
- (e) At December 31, 2020, the aggregate cost for federal income tax purposes is approximately \$604,310,000. The aggregate gross unrealized appreciation is approximately \$522,489,000 and the aggregate gross unrealized depreciation is approximately \$15,485,000, resulting in net unrealized appreciation of approximately \$507,004,000.

(1) Reflects prior period custodian out-of-pocket expenses that were reimbursed in September 2016. The amount of the reimbursement was immaterial on a per share basis and did not impact the total return of Class I shares. The Ratio of Expenses After Expense Limitation would have been 0.03% higher and the Ratio of Net Investment Loss would have been 0.03% lower had the custodian not reimbursed the Fund.

(2) Per share amount is based on average shares outstanding.

(3) Calculated based on the net asset value as of the last business day of the period. Performance does not reflect fees and expenses imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total return would be lower.

(4) The Ratio of Expenses After Expense Limitation and Ratio of Net Investment Loss reflect the rebate of certain Fund expenses in connection with the investments in Morgan Stanley affiliates during the period. The effect of the rebate on the ratios is disclosed in the above table as "Ratio of Rebate from Morgan Stanley Affiliates."

(5) Effective April 29, 2019, the Adviser has agreed to limit the ratio of expenses to average net assets to the maximum ratio of 0.57% for Class I shares. Prior to April 29, 2019, the maximum ratio was 0.80% for Class I shares.

(6) Amount is less than 0.005%.

Financial Highlights

Growth Portfolio

Selected Per Share Data and Ratios	Class II				
	Year Ended December 31,				
	2020	2019	2018	2017	2016 ⁽¹⁾
Net Asset Value, Beginning of Period	\$33.51	\$26.95	\$30.89	\$23.66	\$29.00
Income (Loss) from Investment Operations:					
Net Investment Loss ⁽²⁾	(0.38)	(0.21)	(0.21)	(0.19)	(0.09)
Net Realized and Unrealized Gain (Loss)	37.56	8.68	3.23	10.00	(0.57)
Total from Investment Operations	37.18	8.47	3.02	9.81	(0.66)
Distributions from and/or in Excess of:					
Net Realized Gain	(5.60)	(1.91)	(6.96)	(2.58)	(4.68)
Net Asset Value, End of Period	\$65.09	\$33.51	\$26.95	\$30.89	\$23.66
Total Return⁽³⁾	116.76%	31.47%	7.30%	42.82%	(1.92)%
Ratios to Average Net Assets and Supplemental Data:					
Net Assets, End of Period (Thousands)	\$388,580	\$213,760	\$139,300	\$124,268	\$80,081
Ratio of Expenses Before Expense Limitation	0.99%	1.03%	N/A	1.06%	1.04%
Ratio of Expenses After Expense Limitation	0.81% ⁽⁴⁾	0.86% ⁽⁴⁾⁽⁵⁾	1.04% ⁽⁴⁾	1.04% ⁽⁴⁾	1.01% ⁽⁴⁾
Ratio of Net Investment Loss	(0.80)% ⁽⁴⁾	(0.66)% ⁽⁴⁾	(0.64)% ⁽⁴⁾	(0.68)% ⁽⁴⁾	(0.36)% ⁽⁴⁾
Ratio of Rebate from Morgan Stanley Affiliates	0.01%	0.01%	0.00% ⁽⁶⁾	0.01%	0.00% ⁽⁶⁾
Portfolio Turnover Rate	55%	95%	56%	54%	39%

(1) Reflects prior period custodian out-of-pocket expenses that were reimbursed in September 2016. The amount of the reimbursement was immaterial on a per share basis and did not impact the total return of Class II shares. The Ratio of Expenses After Expense Limitation would have been 0.03% higher and the Ratio of Net Investment Loss would have been 0.03% lower had the custodian not reimbursed the Fund.

(2) Per share amount is based on average shares outstanding.

(3) Calculated based on the net asset value as of the last business day of the period. Performance does not reflect fees and expenses imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total return would be lower.

(4) The Ratio of Expenses After Expense Limitation and Ratio of Net Investment Loss reflect the rebate of certain Fund expenses in connection with the investments in Morgan Stanley affiliates during the period. The effect of the rebate on the ratios is disclosed in the above table as "Ratio of Rebate from Morgan Stanley Affiliates."

(5) Effective April 29, 2019, the Adviser has agreed to limit the ratio of expenses to average net assets to the maximum ratio of 0.82% for Class II shares. Prior to April 29, 2019, the maximum ratio was 1.05% for Class II shares.

(6) Amount is less than 0.005%.

Notes to Financial Statements

Morgan Stanley Variable Insurance Fund, Inc. (the “Company”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as an open-end management investment company. The Company is comprised of ten separate active, diversified and non-diversified funds (individually referred to as a “Fund,” collectively as the “Funds”). The Company applies investment company accounting and reporting guidance.

The accompanying financial statements relate to the Growth Portfolio. The Fund seeks long-term capital appreciation by investing primarily in growth-oriented equity securities of large capitalization companies. The Fund offers two classes of shares — Class I and Class II. Both classes of shares have identical voting rights (except that shareholders of a Class have exclusive voting rights regarding any matter relating solely to that Class of shares), dividend, liquidation and other rights.

The Company is intended to be a funding vehicle for variable annuity contracts and variable life insurance policies offered by the separate accounts of certain life insurance companies.

On April 26, 2019, the Fund acquired the net assets of Morgan Stanley Variable Investment Series Multi Cap Growth (“Multi Cap Growth”), an open-end investment company, based on the respective valuations as of the close of business on April 26, 2019, pursuant to a Plan of Reorganization approved by the shareholders of Multi Cap Growth on February 6, 2019 (“Reorganization”). The purpose of the transaction was to combine two portfolios managed by Morgan Stanley Investment Management Inc., (the “Adviser”) with comparable investment objectives and strategies. The acquisition was accomplished by a tax-free exchange of 6,914,222 Class I shares of the Fund at a net asset value (“NAV”) of \$35.45 for 6,427,253 Class X shares of Multi Cap Growth; 1,840,161 Class II shares of the Fund at a NAV of \$33.35 for 1,745,017 Class Y shares of Multi Cap Growth. The net assets of Multi Cap Growth before the Reorganization were approximately \$306,479,000, including unrealized appreciation (depreciation) of approximately \$84,991,000 at April 26, 2019. The investment portfolio of Multi Cap Growth, with a fair value of approximately \$306,245,000 and identified cost of approximately \$221,254,000, on April 26, 2019, was the principal asset acquired by the Fund. For financial reporting purposes, assets received and shares issued by the Fund were recorded at fair value; however, the cost basis of the investments received from Multi Cap Growth was carried forward to align ongoing reporting of the Fund’s realized and unrealized gains and losses with amounts distributable to

shareholders for tax purposes. Immediately prior to the Reorganization, the net assets of the Fund were approximately \$309,573,000. Immediately after the Reorganization, the net assets of the Fund were approximately \$616,052,000.

Upon closing of the Reorganization, shareholders of Multi Cap Growth received shares of the Fund as follows:

Multi Cap Growth	Growth Portfolio
Class X	Class I
Class Y	Class II

Assuming the acquisition had been completed on January 1, 2019, the beginning of the annual reporting period of the Fund, the Fund’s pro-forma results of operations for the period ended December 31, 2019, are approximately as follows:

Net investment loss ⁽¹⁾	\$ (1,530,000)
Net realized gain and unrealized gain ⁽²⁾	\$217,538,000
Net increase in net assets resulting from operations . . .	\$216,008,000

(1) Approximately \$(2,479,000) as reported, plus approximately \$388,000 from Multi Cap Growth prior to the Reorganization, plus approximately \$561,000 of estimated pro-forma eliminated expenses.

(2) Approximately \$100,979,000 as reported, plus approximately \$116,559,000 from Multi Cap Growth prior to the Reorganization.

Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of Multi Cap Growth that have been included in the Fund’s Statement of Operations since April 26, 2019.

A. Significant Accounting Policies: The following significant accounting policies are in conformity with U.S. generally accepted accounting principles (“GAAP”). Such policies are consistently followed by the Company in the preparation of its financial statements. GAAP may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates.

1. Security Valuation: (1) An equity portfolio security listed or traded on an exchange is valued at its latest reported sales price (or at the exchange official closing price if such exchange reports an official closing price), and if there were no sales on a given day and if there is no official exchange closing price for that day, the security is valued at the mean between the last reported bid and asked prices if such bid and asked prices are available on the relevant exchanges. If only bid prices are available then the latest bid price may be used. Listed equity securities not traded on the valuation date with no reported bid and

Notes to Financial Statements (cont'd)

asked prices available on the exchange are valued at the mean between the current bid and asked prices obtained from one or more reputable brokers or dealers. In cases where a security is traded on more than one exchange, the security is valued on the exchange designated as the primary market; (2) all other equity portfolio securities for which over-the-counter (“OTC”) market quotations are readily available are valued at the latest reported sales price (or at the market official closing price if such market reports an official closing price), and if there was no trading in the security on a given day and if there is no official closing price from relevant markets for that day, the security is valued at the mean between the last reported bid and asked prices if such bid and asked prices are available on the relevant markets. An unlisted equity security that does not trade on the valuation date and for which bid and asked prices from the relevant markets are unavailable is valued at the mean between the current bid and asked prices obtained from one or more reputable brokers or dealers; (3) listed options are valued at the last reported sales price on the exchange on which they are listed (or at the exchange official closing price if such exchange reports an official closing price). If an official closing price or last reported sales price is unavailable, the listed option should be fair valued at the mean between its latest bid and ask prices. Unlisted options are valued at the mean between their latest bid and ask prices from a broker/dealer or valued by a pricing service/vendor; (4) certain portfolio securities may be valued by an outside pricing service/vendor approved by the Company’s Board of Directors (the “Directors”). The pricing service/vendor may employ a pricing model that takes into account, among other things, bids, yield spreads and/or other market data and specific security characteristics. Alternatively, if a valuation is not available from an outside pricing service/vendor, and the security trades on an exchange, the security may be valued at its latest reported sale price (or at the exchange official closing price if such exchange reports an official closing price), prior to the time when assets are valued. If there are no sales on a given day and if there is no official exchange closing price for that day, the security is valued at the mean between the last reported bid and asked prices if such bid and asked prices are available in the relevant exchanges. If only bid prices are available then the latest bid price may be used. If the Adviser, a wholly-owned subsidiary of Morgan Stanley, determines that the price provided by the outside pricing service/vendor or exchange does not reflect the security’s fair value or is unable to provide a

price, prices from brokers or dealers may also be utilized. In these circumstances, the value of the security will be the mean of bid and asked prices obtained from brokers or dealers; (5) when market quotations are not readily available, including circumstances under which the Adviser determines that the closing price, last sale price or the mean between the last reported bid and asked prices are not reflective of a security’s market value, portfolio securities are valued at their fair value as determined in good faith under procedures established by and under the general supervision of the Directors. Occasionally, developments affecting the closing prices of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the foreign market on which the securities trade) and the close of business of the New York Stock Exchange (“NYSE”). If developments occur during such periods that are expected to materially affect the value of such securities, such valuations may be adjusted to reflect the estimated fair value of such securities as of the close of the NYSE, as determined in good faith by the Directors or by the Adviser using a pricing service and/or procedures approved by the Directors; (6) quotations of foreign portfolio securities, other assets and liabilities and forward contracts stated in foreign currency are translated into U.S. dollar equivalents at the prevailing market rates prior to the close of the NYSE; and (7) investments in mutual funds, including the Morgan Stanley Institutional Liquidity Funds, are valued at the net asset value (“NAV”) as of the close of each business day.

The Directors have responsibility for determining in good faith the fair value of the investments, and the Directors may appoint others, such as the Company’s Adviser or a valuation committee, to assist the Directors in determining fair value and to make the actual calculations pursuant to the fair valuation methodologies previously approved by the Directors. Under procedures approved by the Directors, the Company’s Adviser has formed a Valuation Committee whose members are approved by the Directors. The Valuation Committee provides administration and oversight of the Company’s valuation policies and procedures, which are reviewed at least annually by the Directors. These procedures allow the Company to utilize independent pricing services, quotations from securities and financial instrument dealers and other market sources to determine fair value.

2. **Fair Value Measurement:** Financial Accounting Standards Board (“FASB”) Accounting Standards

Notes to Financial Statements (cont'd)

Codification™ (“ASC”) 820, “Fair Value Measurement” (“ASC 820”), defines fair value as the value that the Fund would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. ASC 820 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in valuing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in valuing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Fund’s investments. The inputs are summarized in the three broad levels listed below:

- Level 1 – unadjusted quoted prices in active markets for identical investments
- Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs including the Fund’s own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer’s financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each security.

The following is a summary of the inputs used to value the Fund’s investments as of December 31, 2020:

Investment Type	Level 1 Unadjusted quoted prices (000)	Level 2 Other significant observable inputs (000)	Level 3 Significant unobservable inputs (000)	Total (000)
Assets:				
Common Stocks				
Biotechnology	\$ 8,962	\$ —	\$ —	\$ 8,962

Short-Term Investment				
Investment Company	72,673	—	—	72,673
Total Assets	\$1,071,213	\$37,680	\$2,421†	\$1,111,314†

† Includes a security valued at zero.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes.

The following table presents additional information about valuation techniques and inputs used for investments that are measured at fair value and categorized within Level 3 as of December 31, 2020. Various valuation techniques were used in the valuation of certain investments and weighted based on the level of significance. The Fund calculated the weighted averages of the unobservable inputs relative to each investment's fair value as of December 31, 2020.

	Fair Value at December 31, 2020 (000)	Valuation Technique	Unobservable Input	Amount*	Impact to Valuation from an Increase in Input**
Common Stock	\$1,982	Discounted Cash Flow	Weighted Average Cost of Capital	13.0%	Decrease
			Perpetual Growth Rate	3.5%	Increase
		Market Comparable Companies	Enterprise Value/ Revenue	1.3x	Increase
			Discount for Lack of Marketability	13.0%	Decrease
Preferred Stock	\$439	Discounted Cash Flow	Weighted Average Cost of Capital	14.5%	Decrease
			Perpetual Growth Rate	3.5%	Increase
		Market Comparable Companies	Enterprise Value/ Revenue	5.0x	Increase
			Discount for Lack of Marketability	15.0%	Decrease
		Comparable Transactions	Enterprise Value/ Revenue	4.0x	Increase

* Amount is indicative of the weighted average.

** Represents the expected directional change in the fair value of the Level 3 investments that would result from an increase in the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant changes in these inputs could result in significantly higher or lower fair value measurements.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

	Common Stock (000)	Preferred Stocks (000)
Beginning Balance	\$1,511	\$11,897
Purchases	—	—
Sales	—	—
Amortization of discount	—	—
Transfers in	—	—
Transfers out	—	(9,919)††
Corporate actions	—	—
Change in unrealized appreciation (depreciation)	471	(1,539)
Realized gains (losses)	—	—
Ending Balance	\$1,982	\$ 439†
Net change in unrealized appreciation (depreciation) from investments still held as of December 31, 2020	\$ 471	\$ (1,539)

† Includes a security valued at zero.

†† A security transferred out of level 3 due to an Initial Public Offering.

Notes to Financial Statements (cont'd)

3. Foreign Currency Translation and Foreign Investments:

The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars as follows:

- investments, other assets and liabilities at the prevailing rate of exchange on the valuation date;
- investment transactions and investment income at the prevailing rates of exchange on the dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities held at period end. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) on investments in securities are included in the reported net realized and unrealized gains (losses) on investment transactions and balances. However, pursuant to U.S. federal income tax regulations, gains and losses from certain foreign currency transactions and the foreign currency portion of gains and losses realized on sales and maturities of foreign denominated debt securities are treated as ordinary income for U.S. federal income tax purposes.

Net realized gains (losses) on foreign currency transactions represent net foreign exchange gains (losses) from foreign currency forward exchange contracts, disposition of foreign currencies, currency gains (losses) realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. The change in unrealized currency gains (losses) on foreign currency transactions for the period is reflected in the Statement of Operations.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, fluctuations of exchange

rates in relation to the U.S. dollar, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

Governmental approval for foreign investments may be required in advance of making an investment under certain circumstances in some countries, and the extent of foreign investments in domestic companies may be subject to limitation in other countries. Foreign ownership limitations also may be imposed by the charters of individual companies to prevent, among other concerns, violations of foreign investment limitations. As a result, an additional class of shares (identified as "Foreign" in the Portfolio of Investments) may be created and offered for investment. The "local" and "foreign shares" market values may differ. In the absence of trading of the foreign shares in such markets, the Fund values the foreign shares at the closing exchange price of the local shares.

4. **Derivatives:** The Fund may, but is not required to, use derivative instruments for a variety of purposes, including hedging, risk management, portfolio management or to earn income. Derivatives are financial instruments whose value is based, in part, on the value of an underlying asset, interest rate, index or financial instrument. Prevailing interest rates and volatility levels, among other things, also affect the value of derivative instruments. A derivative instrument often has risks similar to its underlying asset and may have additional risks, including imperfect correlation between the value of the derivative and the underlying asset, risks of default by the counterparty to certain transactions, magnification of losses incurred due to changes in the market value of the securities, instruments, indices or interest rates to which the derivative instrument relates, risks that the transactions may not be liquid and risks arising from margin requirements. The use of derivatives involves risks that are different from, and possibly greater than, the risks associated with other portfolio investments. Derivatives may involve the use of highly specialized instruments that require investment techniques and risk analyses different from those associated with other portfolio investments. All of the Fund's holdings, including derivative instruments, are marked-to-market each day with the change in value reflected in unrealized appreciation (depreciation). Upon disposition, a realized gain or loss is recognized.

Notes to Financial Statements (cont'd)

Certain derivative transactions may give rise to a form of leverage. Leverage magnifies the potential for gain and the risk of loss. Leverage associated with derivative transactions may cause the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet earmarking or segregation requirements, pursuant to applicable Securities and Exchange Commission (“SEC”) rules and regulations, or may cause the Fund to be more volatile than if the Fund had not been leveraged. Although the Adviser seeks to use derivatives to further the Fund’s investment objectives, there is no assurance that the use of derivatives will achieve this result.

Following is a description of the derivative instruments and techniques that the Fund used during the period and their associated risks:

Options: With respect to options, the Fund is subject to equity risk, interest rate risk and foreign currency exchange risk in the normal course of pursuing its investment objectives. If the Fund buys an option, it buys a legal contract giving it the right to buy or sell a specific amount of the underlying instrument or foreign currency, or futures contract on the underlying instrument or foreign currency, at an agreed-upon price during a period of time or on a specified date typically in exchange for a premiums paid by the Fund. The Fund may purchase and/or sell put and call options. Purchasing call options tends to increase the Fund’s exposure to the underlying (or similar) instrument. Purchasing put options tends to decrease the Fund’s exposure to the underlying (or similar) instrument. When entering into purchased option contracts, the Fund bears the risk of interest or exchange rates or securities prices moving unexpectedly, in which case, the Fund may not achieve the anticipated benefits of the purchased option contracts; however the risk of loss is limited to the premium paid. Purchased options are reported as part of “Total Investments in Securities” in the Statement of Assets and Liabilities. Premiums paid for purchasing options which expired are treated as realized losses. If the Fund sells an option, it sells to another party the right to buy from or sell to the Fund a specific amount of the underlying instrument or foreign currency, or futures contract on the underlying instrument or foreign currency, at an agreed-upon price during a period of time or on a specified date typically in exchange for a premium received

by the Fund. When options are purchased OTC, the Fund bears the risk that the counterparty that wrote the option will be unable or unwilling to perform its obligations under the option contract. Options may also be illiquid and the Fund may have difficulty closing out its position. A decision as to whether, when and how to use options involves the exercise of skill and judgment and even a well-conceived option transaction may be unsuccessful because of market behavior or unexpected events. The prices of options can be highly volatile and the use of options can lower total returns.

FASB ASC 815, “Derivatives and Hedging” (“ASC 815”), is intended to improve financial reporting about derivative instruments by requiring enhanced disclosures to enable investors to better understand how and why the Fund uses derivative instruments, how these derivative instruments are accounted for and their effects on the Fund’s financial position and results of operations.

The following table sets forth the fair value of the Fund’s derivative contracts by primary risk exposure as of December 31, 2020:

	Asset Derivatives Statement of Assets and Liabilities Location	Primary Risk Exposure	Value (000)
Purchased Options	Investments, at Value (Purchased Options)	Currency Risk	\$756(a)

(a) Amounts are included in Investments in Securities in the Statement of Assets and Liabilities.

The following tables set forth by primary risk exposure the Fund’s realized gains (losses) and change in unrealized appreciation (depreciation) by type of derivative contract for the year ended December 31, 2020 in accordance with ASC 815:

Realized Gain (Loss)		
Primary Risk Exposure	Derivative Type	Value (000)
Currency Risk	Investments (Purchased Options)	\$(1,781)(b)

(b) Amounts are included in Investments Sold in the Statement of Operations.

Change in Unrealized Appreciation (Depreciation)		
Primary Risk Exposure	Derivative Type	Value (000)
Currency Risk	Investments (Purchased Options)	\$(1,887)(c)

(c) Amounts are included in Investments in the Statement of Operations.

Notes to Financial Statements (cont'd)

At December 31, 2020, the Fund's derivative assets and liabilities are as follows:

Gross Amounts of Assets and Liabilities Presented in the Statement of Assets and Liabilities

Derivatives	Assets(d) (000)	Liabilities(d) (000)
Purchased Options	\$756(a)	\$—

(a) Amounts are included in Investments in Securities in the Statement of Assets and Liabilities.

(d) Absent an event of default or early termination, OTC derivative assets and liabilities are presented gross and not offset in the Statement of Assets and Liabilities.

The Fund typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements (collectively, "Master Agreements") with its contract counterparties for certain OTC derivatives in order to, among other things, reduce its credit risk to counterparties. ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Fund typically may offset with the counterparty certain OTC derivative financial instruments' payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default, termination and/or potential deterioration in the credit quality of the counterparty. Various Master Agreements govern the terms of certain transactions with counterparties, including transactions such as swap, forward, repurchase and reverse repurchase agreements. These Master Agreements typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements typically provide that a default in connection with one transaction between the Fund and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party and may be a feature in certain Master Agreements. In the event the Fund exercises its right to terminate a Master Agreement after a counterparty experiences a termination event as defined in the Master Agreement, the return of collateral with market value in excess of the Fund's net liability may be delayed or denied.

The following table presents derivative financial instruments that are subject to enforceable netting arrangements as of December 31, 2020:

Gross Amounts Not Offset in the Statement of Assets and Liabilities

Counterparty	Gross Asset Derivatives Presented in the Statement of Assets and Liabilities(a) (000)	Financial Instrument (000)	Collateral Received(e) than (000)	Net Amount (not less than \$0) (000)
BNP Paribas	\$635	\$—	\$(635)	\$0
Royal Bank of Scotland	121	—	(121)	0
Total	\$756	\$—	\$(756)	\$0

(a) Amounts are included in Investments in Securities in the Statement of Assets and Liabilities.

(e) In some instances, the actual collateral received may be more than the amount shown here due to overcollateralization.

For the year ended December 31, 2020, the approximate average monthly amount outstanding for each derivative type is as follows:

Purchased Options:

Average monthly notional amount 517,462,000

- 5. Restricted Securities:** The Fund invests in unregistered or otherwise restricted securities. The term "restricted securities" refers to securities that are unregistered or are held by control persons of the issuer and securities that are subject to contractual restrictions on their resale. As a result, restricted securities may be more difficult to value and the Fund may have difficulty disposing of such assets either in a timely manner or for a reasonable price. In order to dispose of an unregistered security, the Fund, where it has contractual rights to do so, may have to cause such security to be registered. A considerable period may elapse between the time the decision is made to sell the security and the time the security is registered so that the Fund can sell it. Contractual restrictions on the resale of securities vary in length and scope and are generally the result of a negotiation between the issuer and the acquirer of the securities. The Fund would, in either case, bear market risks during that period. Restricted securities are identified in the Portfolio of Investments.
- 6. Indemnifications:** The Company enters into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is

Notes to Financial Statements (cont'd)

unknown. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

7. Security Transactions, Income and Expenses:

Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on the sale of investment securities are determined on the specific identified cost method. Dividend income and other distributions are recorded on the ex-dividend date (except for certain foreign dividends which may be recorded as soon as the Fund is informed of such dividends) net of applicable withholding taxes. Interest income is recognized on the accrual basis except where collection is in doubt. Discounts are accreted and premiums are amortized over the life of the respective securities. Most expenses of the Company can be directly attributed to a particular Fund. Expenses which cannot be directly attributed are apportioned among the Funds based upon relative net assets or other appropriate methods. Income, expenses (other than class specific expenses) and realized and unrealized gains or losses are allocated to each class of shares based upon their relative net assets.

8. Dividends and Distributions to Shareholders:

Dividends and distributions to shareholders are recorded on the ex-dividend date. Dividends from net investment income, if any, are declared and paid annually. Net realized capital gains, if any, are distributed at least annually.

B. Advisory Fees: The Adviser, a wholly-owned subsidiary of Morgan Stanley, provides the Fund with advisory services under the terms of an Investment Advisory Agreement, paid quarterly, at the annual rate based on the daily net assets as follows:

First \$1 billion	Next \$1 billion	Next \$1 billion	Over \$3 billion
0.50%	0.45%	0.40%	0.35%

For the year ended December 31, 2020, the advisory fee rate (net of waiver/rebate) was equivalent to an annual effective rate of 0.32% of the Fund's average daily net assets.

The Adviser has agreed to reduce its advisory fee and/or reimburse the Fund so that total annual Fund operating expenses, excluding certain investment related expenses, taxes, interest and other extraordinary expenses (including litigation), will not exceed 0.57% for Class I shares and 0.82% for Class II shares. The fee waivers and/or expense reimbursements will

continue for at least two years from the date of the Reorganization or until such time as the Directors act to discontinue all or a portion of such waivers and/or reimbursements when they deem such action is appropriate. For the year ended December 31, 2020, approximately \$1,432,000 of advisory fees were waived pursuant to this arrangement.

C. Administration Fees: The Adviser also serves as Administrator to the Company and provides administrative services pursuant to an Administration Agreement for an annual fee, accrued daily and paid monthly, of 0.08% of the Fund's average daily net assets.

Under a Sub-Administration Agreement between the Administrator and State Street Bank and Trust Company ("State Street"), State Street provides certain administrative services to the Company. For such services, the Administrator pays State Street a portion of the fee the Administrator receives from the Fund.

D. Servicing Fees: The Company accrues daily and pays quarterly a servicing fee of up to 0.17% of the average daily value of shares of the Fund held in an insurance company's account. Certain insurance companies have entered into a servicing agreement with the Company to provide administrative and other contract-owner related services on behalf of the Fund.

E. Distribution Fees: Morgan Stanley Distribution, Inc. ("MSDI" or the "Distributor"), a wholly-owned subsidiary of the Adviser and an indirect subsidiary of Morgan Stanley, serves as the Distributor of the Fund and provides the Fund's Class II shareholders with distribution services pursuant to a Distribution Plan (the "Plan") in accordance with Rule 12b-1 under the Act. Under the Plan, the Fund is authorized to pay the Distributor a distribution fee, which is accrued daily and paid monthly, at an annual rate of 0.25% of the Fund's average daily net assets attributable to Class II shares.

F. Dividend Disbursing and Transfer Agent: The Company's dividend disbursing and transfer agent is DST Asset Manager Solutions, Inc. ("DST"). Pursuant to a Transfer Agency Agreement, the Company pays DST a fee based on the number of classes, accounts and transactions relating to the Funds of the Company.

G. Custodian Fees: State Street (the "Custodian") also serves as Custodian for the Company in accordance with a Custodian Agreement. The Custodian holds cash, securities

Notes to Financial Statements (cont'd)

and other assets of the Company as required by the Act. Custody fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses.

H. Security Transactions and Transactions with Affiliates:

For the year ended December 31, 2020, purchases and sales of investment securities for the Fund, other than long-term U.S. Government securities and short-term investments were approximately \$439,902,000 and \$662,074,000, respectively. There were no purchases and sales of long-term U.S. Government securities for the year ended December 31, 2020.

The Fund invests in the Institutional Class of the Morgan Stanley Institutional Liquidity Funds — Treasury Securities Portfolio (the “Liquidity Funds”), an open-end management investment company managed by the Adviser. Advisory fees paid by the Fund are reduced by an amount equal to its pro-rata share of the advisory and administration fees paid by the Fund due to its investment in the Liquidity Funds. For the year ended December 31, 2020, advisory fees paid were reduced by approximately \$45,000 relating to the Fund’s investment in the Liquidity Funds.

A summary of the Fund’s transactions in shares of affiliated investments during the year ended December 31, 2020 is as follows:

Affiliated Investment Company	Value			
	December 31, 2019 (000)	Purchases at Cost (000)	Proceeds from Sales (000)	Dividend Income (000)
Liquidity Funds	\$5,219	\$370,175	\$302,721	\$43

Affiliated Investment Company (cont'd)	Realized Gain (Loss) (000)	Change in Unrealized Appreciation (Depreciation) (000)	Value
			December 31, 2020 (000)
Liquidity Funds	\$—	\$—	\$72,673

The Fund is permitted to purchase and sell securities (“cross-trade”) from and to other Morgan Stanley funds as well as other funds and client accounts for which the Adviser or an affiliate of the Adviser serves as investment adviser, pursuant to procedures approved by the Directors in compliance with Rule 17a-7 under the Act (the “Rule”). Each cross-trade is executed at the current market price in compliance with provisions of the Rule. For the year ended December 31, 2020, the Fund engaged in cross-trade sales of approximately

\$25,191,000, which resulted in net realized gains of approximately \$24,031,000.

The Fund has an unfunded Deferred Compensation Plan (the “Compensation Plan”), which allows each independent Director to defer payment of all, or a portion, of the fees he or she receives for serving on the Board of Directors. Each eligible Director generally may elect to have the deferred amounts credited with a return equal to the total return on one or more of the Morgan Stanley funds that are offered as investment options under the Compensation Plan. Appreciation/depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the NAV of the Fund.

I. Federal Income Taxes: It is the Fund’s intention to continue to qualify as a regulated investment company and distribute all of its taxable and tax-exempt income. Accordingly, no provision for federal income taxes is required in the financial statements.

The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued based on net investment income, net realized gains and net unrealized appreciation as such income and/or gains are earned. Taxes may also be based on transactions in foreign currency and are accrued based on the value of investments denominated in such currency.

FASB ASC 740-10, “Income Taxes — Overall”, sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Management has concluded there are no significant uncertain tax positions that would require recognition in the financial statements. If applicable, the Fund recognizes interest accrued related to unrecognized tax benefits in “Interest Expense” and penalties in “Other Expenses” in the Statement of Operations. The Fund files tax returns with the U.S. Internal Revenue Service, New York and various states. Generally, each of the tax years in the four-year period ended December 31, 2020 remains subject to examination by taxing authorities.

The tax character of distributions paid may differ from the character of distributions shown for GAAP purposes due to short-term capital gains being treated as ordinary income for

Notes to Financial Statements (cont'd)

tax purposes. The tax character of distributions paid during fiscal years 2020 and 2019 was as follows:

2019 Distributions Paid From:		2019 Distributions Paid From:	
Ordinary Income (000)	Long-Term Capital Gain (000)	Ordinary Income (000)	Long-Term Capital Gain (000)
\$13,028	\$77,000	\$—	\$33,200

The amount and character of income and gains to be distributed are determined in accordance with income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature.

Temporary differences are attributable to differing book and tax treatments for the timing of the recognition of gains (losses) on certain investment transactions and the timing of the deductibility of certain expenses.

The Fund had no permanent differences causing reclassifications among the components of net assets for the year ended December 31, 2020.

At December 31, 2020, the components of distributable earnings for the Fund on a tax basis were as follows:

Undistributed Ordinary Income (000)	Undistributed Long-Term Capital Gain (000)
\$34,650	\$250,363

J. Credit Facility: The Company and other Morgan Stanley funds participated in a \$300,000,000 committed, unsecured revolving line of credit facility (the “Facility”) with State Street. This Facility is to be used for temporary emergency purposes or funding of shareholder redemption requests. The interest rate on borrowings is based on the federal funds rate or 1 month LIBOR rate plus a spread. The Facility also has a commitment fee of 0.25% per annum based on the unused portion of the Facility. During the year ended December 31, 2020, the Fund did not have any borrowings under the Facility.

K. Other: At December 31, 2020, the Fund had record owners of 10% or greater. Investment activities of these shareholders could have a material impact on the Fund. The aggregate percentage of such owners was 69.1%.

L. Market Risk: Certain impacts to public health conditions particular to the coronavirus (COVID-19) outbreak could impact the operations and financial performance of certain of the Fund’s investments. The extent of the impact to

the financial performance of the Fund’s investments will depend on future developments, including (i) the duration and spread of the outbreak, (ii) the restrictions and advisories, (iii) the effects on the financial markets, and (iv) the effects on the economy overall, all of which are highly uncertain and cannot be predicted. If the financial performance of the Fund’s investments is impacted because of these factors for an extended period, the Fund’s investment results may be adversely affected.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of
Morgan Stanley Variable Insurance Fund, Inc. —
Growth Portfolio

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Growth Portfolio (the “Fund”) (one of the funds constituting Morgan Stanley Variable Insurance Fund, Inc. (the “Company”)), including the portfolio of investments, as of December 31, 2020, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of Growth Portfolio (one of the funds constituting Morgan Stanley Variable Insurance Fund, Inc.) at December 31, 2020, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities law and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of the Company’s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020 by correspondence with the custodian and others or by other appropriate auditing procedures where replies from others were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The signature of Ernst & Young LLP is written in a black, cursive script. The words "Ernst & Young" are written in a larger, more prominent font, with "LLP" in a smaller font to the right. The signature is positioned in the lower right quadrant of the page.

We have served as the auditor of one or more Morgan Stanley investment companies since 2000.

Liquidity Risk Management Program (unaudited)

In compliance with Rule 22e-4 under the Investment Company Act of 1940, as amended (the “Liquidity Rule”), the Fund has adopted and implemented a liquidity risk management program (the “Program”), which is reasonably designed to assess and manage the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of remaining investors’ interests in the Fund (i.e., liquidity risk). The Fund’s Board of Directors (the “Board”) previously approved the designation of the Liquidity Risk Subcommittee (the “LRS”) as Program administrator. The LRS is comprised of representatives from various divisions within Morgan Stanley Investment Management.

At a meeting held on April 22-23, 2020, the Board reviewed a written report prepared by the LRS that addressed the Program’s operation and assessed its adequacy, and effectiveness of implementation for the period from December 1, 2018, through December 31, 2019, as required under the Liquidity Rule. The report concluded that the Program operated effectively and was adequately and effectively implemented in all material aspects, and that the relevant controls and safeguards were appropriately designed to enable the LRS to administer the Program in compliance with the Liquidity Rule.

In accordance with the Program, the LRS assessed each Fund’s liquidity risk no less frequently than annually taking into consideration certain factors, as applicable, such as (i) investment strategy and liquidity of portfolio investments, (ii) short-term and long-term cash flow projections and (iii) holdings of cash and cash equivalents and borrowing arrangements and other funding sources. Certain factors are considered under both normal and reasonably foreseeable stressed conditions.

Each Fund portfolio investment is classified into one of four liquidity categories, which classification is assessed at least monthly by the LRS. The classification is based on a determination of the number of days it is reasonably expected to take to convert the investment into cash, or sell or dispose of the investment, in current market conditions without significantly changing the market value of the investment. Liquidity classification determinations take into account various market, trading and investment-specific considerations, as well as market depth, and in some cases utilize third-party vendor data.

The Liquidity Rule limits a fund’s investments in illiquid investments to 15% of its net assets and requires funds that do not primarily hold assets that are highly liquid investments to determine and maintain a minimum percentage of the fund’s net assets to be invested in highly liquid investments (highly liquid investment minimum or “HLIM”). The LRS believes that the Program includes provisions reasonably designed to review, monitor and comply with the 15% limit on illiquid investments and for determining, periodically reviewing and complying with the HLIM requirement, as applicable.

There can be no assurance that the Program will achieve its objectives under all circumstances in the future. Please refer to the Fund’s prospectus for more information regarding the Fund’s exposure to liquidity risk and other risks to which it may be subject.

Federal Tax Notice (unaudited)

For federal income tax purposes, the following information is furnished with respect to the distributions paid by the Fund during its taxable year ended December 31, 2020.

The Fund designated and paid approximately \$77,000,000 as a long-term capital gain distribution.

In January, the Fund provides tax information to shareholders for the preceding calendar year.

Reporting to Shareholders

Each Morgan Stanley fund provides a complete schedule of portfolio holdings in its Semi-Annual and the Annual Reports within 60 days of the end of the fund's second and fourth fiscal quarters. The Semi-Annual and Annual Reports are filed electronically with the Securities and Exchange Commission ("SEC") on Form N-CSRS and Form N-CSR, respectively. Morgan Stanley also delivers the Semi-Annual and Annual Reports to fund shareholders and makes these reports available on its public website, www.morganstanley.com/im/shareholderreports. Each Morgan Stanley non-money market fund also files a complete schedule of portfolio holdings with the SEC for the fund's first and third fiscal quarters as an attachment to Form N-PORT. Morgan Stanley does not deliver the reports for the first and third fiscal quarters to shareholders, but makes the complete schedule of portfolio holdings for the fund's first and third fiscal quarters available on its public website. The holdings for each money market fund are also posted to the Morgan Stanley public website. You may obtain the Form N-PORT filings (as well as the Form N-CSR and N-CSRS filings) by accessing the SEC's website, www.sec.gov. You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's email address (publicinfo@sec.gov).

Proxy Voting Policies and Procedures and Proxy Voting Record

You may obtain a copy of the Company's Proxy Voting Policy and Procedures and information regarding how the Company voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30, without charge, upon request, by calling toll free 1 (800) 548-7786 or by visiting our website at www.morganstanley.com/im/shareholderreports. This information is also available on the SEC's website at www.sec.gov.

This report is submitted for the general information of the shareholders of the Fund. For more detailed information about the Fund, its fees and expenses and other pertinent information, please read its Prospectus. The Company's Statement of Additional Information contains additional information about the Fund, including its Directors. It is available, without charge, by calling 1 (800) 548-7786.

This report is not authorized for distribution to prospective investors in the Fund unless preceded or accompanied by an effective Prospectus. Read the Prospectus carefully before investing.
